

# Gateway MS2370 Screen Replacement

Instructions to remove the screen from the Gateway MS2370 laptop.

Written By: Mathieu Bolduc-Clayton

# INTRODUCTION

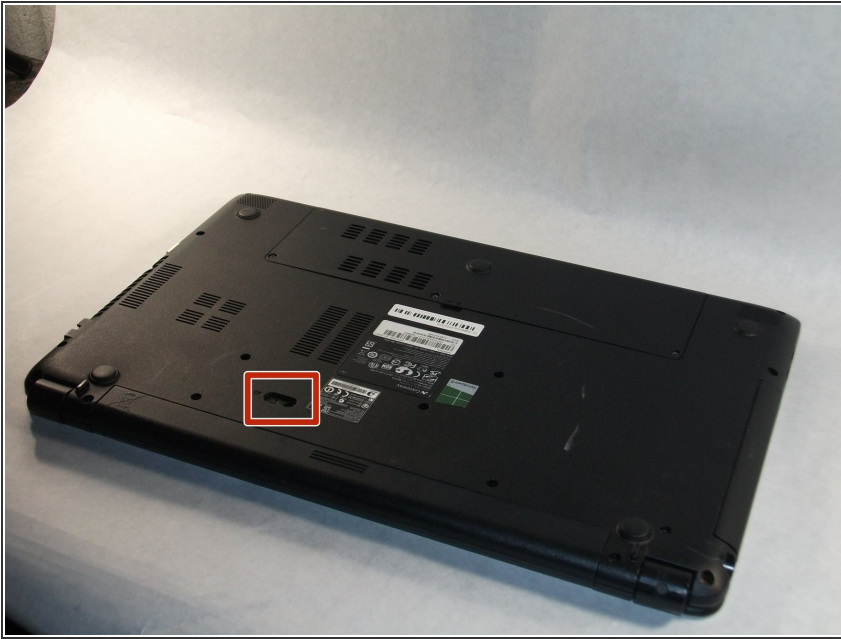

This guide shows the user how to properly remove the screen from the Gateway MS2370 Laptop.

## TOOLS:

- [Spudger](#) (1)
  - [64 Bit Driver Kit](#) (1)
-

## Step 1 — Battery

- Make sure the laptop is turned off and flipped over so that the bottom is facing up. Then, locate the battery clip as shown.

## Step 2

- Either using your fingers or a plastic spudger push the battery clip to the left to release battery.

## Step 3

- Pull the battery from the laptop to remove it.

## Step 4 — Screen

- Using the pointed tweezers, remove plastic circles that are stuck onto the back of the laptop's hinges.
- ⓘ These plastic circles are stuck inside the hole with adhesive and might require a significant amount of force.

## Step 5

- Unscrew both of the 3mm Phillips 01 screws on both hinges using the matching screwdriver.

## Step 6

- Take the plastic spudger and pull up the tabs on all four sides of the screen molding.

## Step 7

- Carefully remove the screen molding. Be aware that the screen molding will not come out all the way.

## Step 8

- Unscrew the four 3mm inch Phillips 01 screws on the screen bracket.

## Step 9

- Peel up the tape over the connector and unplug the screen from the laptop.

## Step 10

- Slowly remove the screen from the laptop.

To reassemble your device, follow these instructions in reverse order.
