Step 1 — Battery

- Remove all 10 Phillips screws on the backplate.

- (i) All 10 screws are 0.55 inches and 20 mm in diameter.

Step 2
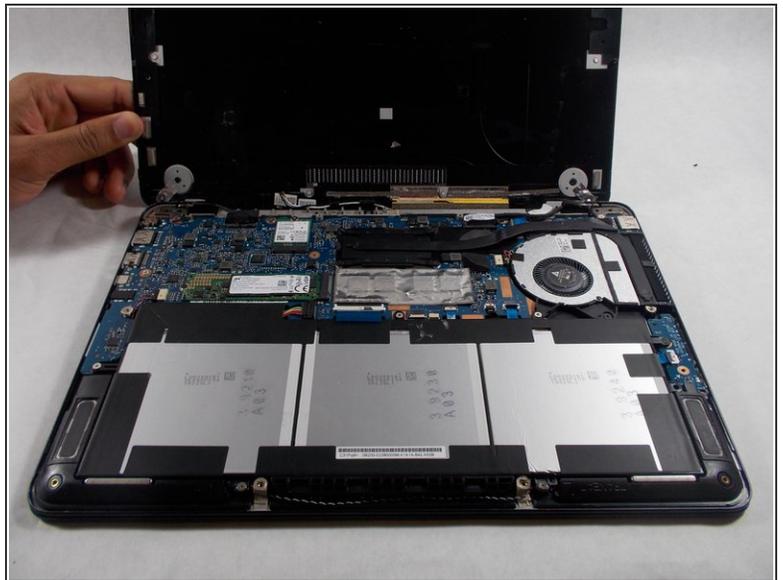

- Carefully remove the backplate using the plastic opening tool.

Step 3

- Locate the battery near the bottom.

Step 4
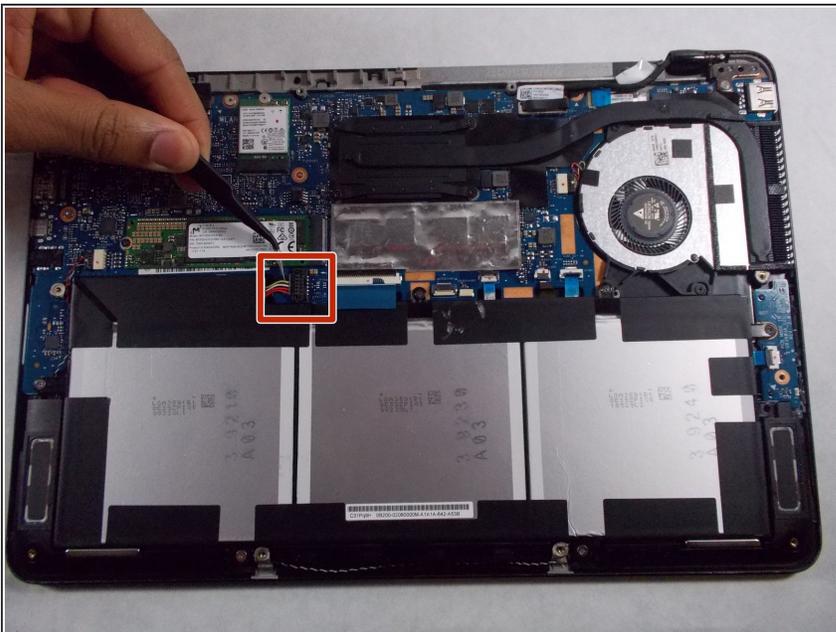

- Next, lift up the battery connector from the laptop in the upper left side of the battery, using tweezers or spudger.

⚠ Make sure to complete this step with caution, because if the battery is not unplugged, the motherboard may shock you.
