INTRODUCTION

This guide will provide simple, easy to follow instructions for replacing the Hard Drive Disk for HP-15ay014dx

🔧 TOOLS:

Phillips #00 Screwdriver (1)
Spudger (1)
Tweezers (1)
iFixit Opening Tool (1)

Step 1 — Battery

⚠️ Disconnect device from power source and power down.

Step 2

- With the device turned upside down, use your index fingers to push the battery latches in towards each other.

Step 3

- ⓘ The latch on your left will stay at the inward position, while the latch on the right will slide back out.

- Gently grasp the battery and pull it back away from the device and yourself.

Step 4 — Optical Drive

- Close the laptop and lay it down with the bottom facing up.

- Using a size #00 Phillips screw drive remove the screw holding in the optical drive.

Step 5

- Grip the optical drive and gently pull it out.

Step 6 — Hard Drive Disk

- Remove the highlighted screws holding the body of the laptop together with a size #00 Phillips screwdriver.
Step 7

- Using the spudger, push in the tabs in the back that hold the body together. Carefully pry the body apart by working the spudger around the body.
- Pull the back cover off.

Step 8

- Pry up on the clamp holding the SATA power ribbon using the plastic opening tool.

- Pull out the SATA power ribbon using the tweezers.

Step 9

- Remove the highlighted screws holding the hard drive to the body using the Philips #00 screwdriver.

- Remove the hard drive.

Step 10

- Remove the 4 screws holding the hard drive to the hard drive cage using the Philips #00 screwdriver.

To reassemble your device, follow these instructions in reverse order.
