

# Samsung Galaxy J1 Glass Screen Replacement

This guide will assist with the replacement of the Glass Screen of the Samsung Galaxy J1.

Written By: Sean Kramer

## TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Midframe

- Insert a finger nail or plastic opening tool between the back cover and the device.
- Gently pry the rear cover off of the back of the phone.

## Step 2

- Using a finger, pull the SIM card down out of its slot.
  - Remove the SIM card.
- i** The pictured device is missing the SIM card and battery.

## Step 3

- Using a Phillips #00 screwdriver remove the eleven 3 mm screws.

## Step 4

- Insert a plastic opening tool between the screen and the back of the device.
- Starting at the bottom of the device, gently slide the tool along the edges of the screen.
- Gently pry the main assembly from the midframe of the device.

 When removing the main assembly, pry gently so as to not crack the glass screen or break any clips within the device.

## Step 5 — Glass Screen

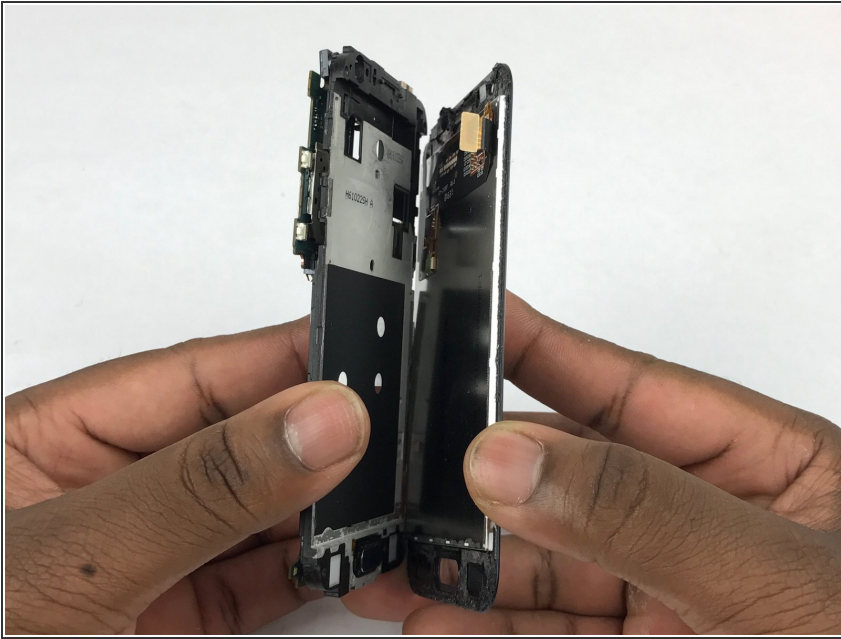

- Using the flat end of a spudger, disconnect the digitizer cable connector.

## Step 6

- Using a plastic opening tool pry between silver digitizer and black back piece.
  - Slowly slide plastic opening tool around the screen to loosen the adhesive.
- ⚠ Be careful not to tear the digitizer cable when threading it through the plastic housing.

## Step 7

- Carefully separate display assembly from the plastic housing.

To reassemble your device, follow these instructions in reverse order.
