Step 1 — Battery

- Start with the bottom of the laptop facing up.

Step 2

- Remove the 15 screws from the bottom of the laptop with a PH1 screwdriver.

- Remove the bottom plate

- (i) Keep track of all the screws and which slot they came from, as they slightly differ. We recommend this system: lay out on a piece of paper and pretending the paper is the device. Place the screws on the paper approximately where they would go

Step 3

- Remove the screw holding down the battery with a PH1 screwdriver.

- Pull out the battery.

To reassemble your device, follow these instructions in reverse order.
