-

## Step 1 — Back Cover

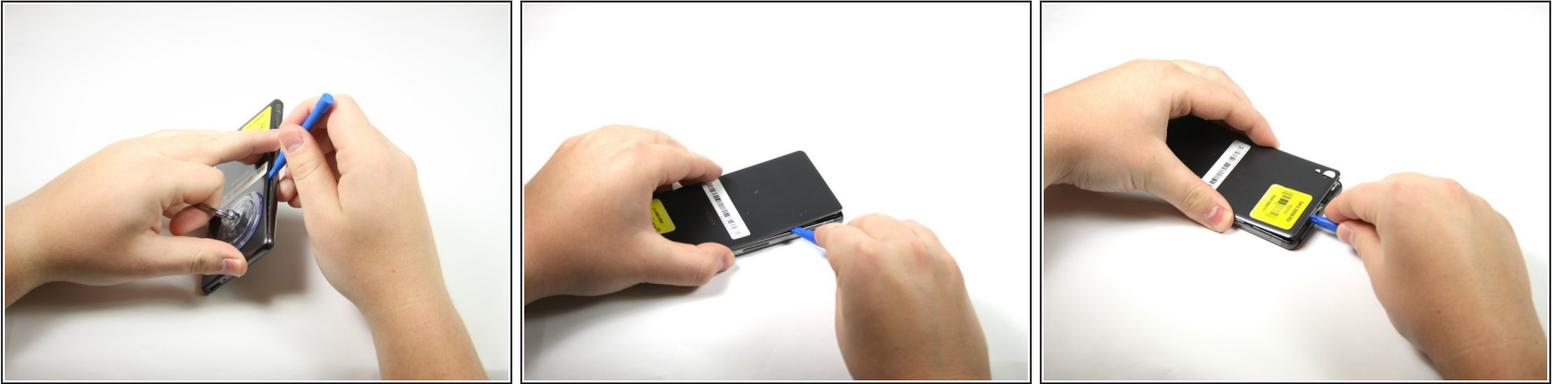

- Apply heat on the back surface of the phone.
- ⓘ Continue to heat the device as needed throughout the replacement process.
- ⚠ The device can get very hot, so be careful when handling it.

## Step 2

- Stick the small suction cup on the bottom half of the back surface of the phone.

### Step 3

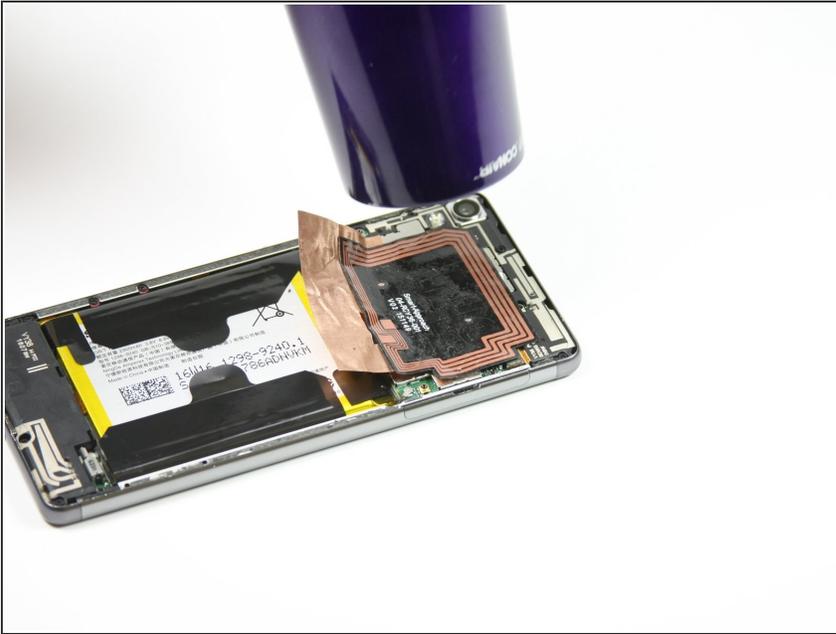

- With the bottom of the device facing you, lift up on the suction cup handle.
- Use the plastic opening tool around all sides to pry off the back cover.

### Step 4

- Pull the back of the phone case away from the device.
- ⓘ You will hear popping sounds of glue being ripped from the phone.
- ⓘ You will hear the sound of the back unlatching from the device.
- ✎ You will need to apply adhesive or glue along the device to have maximum seal in reassembly.
- ⓘ RAF antenna may be attached to the back cover upon removal.

## Step 5

- Apply heat to the copper RAF antenna.
- ⓘ This step and the following step only apply if the RAF antenna does not come off when taking the back cover off.

## Step 6

- Peel back the RAF antenna.

## Step 7 — Battery

- Peel back the black tabs on the battery.
- ⓘ This may require some force as you are breaking the adhesive seal.
- 🔧 You will need to apply more adhesive for the reassembly.

## Step 8

- Use a plastic opening tool to pry up the orange battery connector that is directly above the battery in the center of the phone.

## Step 9

- Use a plastic opening tool to get under the battery and pry it up.

## Step 10

- Lift the battery out with your hands.

To reassemble your device, follow these instructions in reverse order.
