

Samsung Galaxy S7 Active Front Camera Replacement

How to replace the Samsung Galaxy S7 Active front camera.

Written By: Alexander Yazdani

INTRODUCTION

This guide will show you how to replace the Samsung Galaxy S7 Active front camera.

TOOLS:

- [Hair Dryer](#) (1)
 - [Heat Gun](#) (1)
 - [Metal Spudger](#) (1)
 - [Tweezers](#) (1)
 - [Phillips #000 Screwdriver](#) (1)
-

Step 1 — Samsung Galaxy S7 Active Disassembly

- Melt the adhesive on the screen by applying a blow dryer directly on the screen.

⚠ Your phone is hot, please do not touch it with your bare hand.

Step 2

- Wedge the metal spudger in between the screen and the frame to begin separating them.
- ⓘ It would be easier to separate the screen from the sealing adhesive on the frame if you with more than one metal spudger.
- ⓘ Your phone might no longer be watertight after you reassemble it.

Step 3

- Slide the metal spudger around the phone at least once.
- ⓘ It would be easier to slide your metal spudger if you apply the blow dryer to where you are currently sliding.

Step 4

- Lift the screen up with your hands.
- ⚠ Please wash your hands thoroughly with hot water and soap after you finish.

Step 5 — Battery

- Use a Phillips #000 screwdriver to remove a single screw.

Step 6

- Use tweezers to remove the small plastic cover you just unscrewed.

Step 7

- Use tweezers to remove the other small plastic cover.

Step 8

- Use a Phillips head #000 to take out the eleven screws marked in the photo.

Step 9

- Use tweezers to disconnect the marked pieces from the motherboard.

Step 10

- Use tweezers to take out the middle button and its connection to the motherboard.

Step 11

- Use a metal spudger to pull the mid frame and battery off of the motherboard.

Step 12

- Use a spudger to remove the battery from the midframe.

To install a new battery and adhesive, [follow this guide](#).

Step 13 — Rear Camera

- Use tweezers to disconnect the front camera from the battery.
- ⓘ The connector should unsnap similar to a lego piece.

Step 14 — Motherboard

- Use a Phillips 000 screwdriver to remove the screw covering the proximity sensor.

Step 15

- Use tweezers to remove the proximity sensor.
- Set this aside for now.

Step 16

- Use tweezers to disconnect the front mic and the two cables that have been marked in the photo.

Step 17

- Use your hands and a metal spudger to lift the motherboard out of the phone.
- ⓘ Be gentle, as there is still a connection on the underside of the motherboard.
- Use a metal spudger to remove this connection.

Step 18 — Front Camera

- Use tweezers to remove the connection between the motherboard and the front camera.
- ⓘ In order to do this, the motherboard must be flipped over from its original position.

To reassemble your device, follow these instructions in reverse order.
