

Samsung Galaxy Note Edge Battery Replacement

Replacing the battery of a Samsung Galaxy Note Edge.

Written By: Nicholas Guillermo-Martinez

INTRODUCTION

Your Samsung Galaxy Note Edge's battery may be dead or damaged and in need of replacement. Be wary and cautious of batteries that are leaking or damaged. Before beginning the repair guide, ensure you have the proper replacement battery- a Lithium-Ion 3000 mAh battery.

TOOLS:

- [Spudger](#) (1)
-

Step 1 — Battery

- Power down your device and make sure that it is turned off.
- Place the phone with the screen facing down on a clean flat surface.

Step 2

- Use your Supdger to remove the back cover of the phone using notch located in the top left corner of the phone.
 - Remove battery by using your Supdger on the notch located directly underneath battery location.
-  During the creation of this guide, we did not have access to a battery in our device.

To reassemble your device, follow these instructions in reverse order.
