## INTRODUCTION

This guide will show you how to prepare the computer for the removal of the panel underneath the keyboard.

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Battery

- Rotate the laptop so its bottom is facing up.

## Step 2

- Identify the lock mechanisms holding the battery in place.
- Slide each button outward with your fingers to disengage the battery.
- Pull the battery off with your hand to separate it from the laptop.

### Step 3 — Bottom Panel

- Locate the thirteen 10 mm Phillips #1 screws securing the bottom panel of the laptop.
- Remove the thirteen indicated screws with a Phillips #1 screwdriver.
- ⓘ With the screws removed you can now remove the panel underneath keyboard.

To reassemble your device, follow these instructions in reverse order.
