Written By: Abdulrahman Alkhalifah

## INTRODUCTION

This guide shows the users how to replace the Bissell PowerForce Compact vacuum belt using the tools and parts listed in this guide.

### TOOLS:

- [Phillips #2 Screwdriver](#) (1)

### PARTS:

- [Belt](#) (1)  
Durabelt Dirt Devil Style 15 Belt Pkg

## Step 1 — Belt

- Remove the 5 screws from the brush plate with the phillips screwdriver.

## Step 2

- Lift off the brush plate by grabbing both ends of the plate and lifting the plate up.

### Step 3

- Grab the rotating brush at both ends.
- Lift the rotating brush straight out of the vacuum.
- Remove the belt from the motor pulley.

### Step 4

- Clear the bottom of the vacuum from any debris that may be blocking air flow.
- Clean the rotating brush from any wrapped string or hair. You can use scissors if needed.

## Step 5

- Check the new belt for any damage.
- Place the belt on the rotating brush and then the motor pulley.

## Step 6

- Pull the rotating brush with the belt hooked.
- Place the ends of the rotating brush into the slots.
- Rotate the brush a few times to center the belt.

To reassemble your device, follow these instructions in reverse order.
