

# Corsair Katar Disassembly

This guide will help with the disassembly of the Corsair Katar gaming mouse.

Written By: Ryan Matesa

---

## INTRODUCTION

If you need to disassemble your Corsair Katar mouse, this guide will demonstrate how to take it apart.

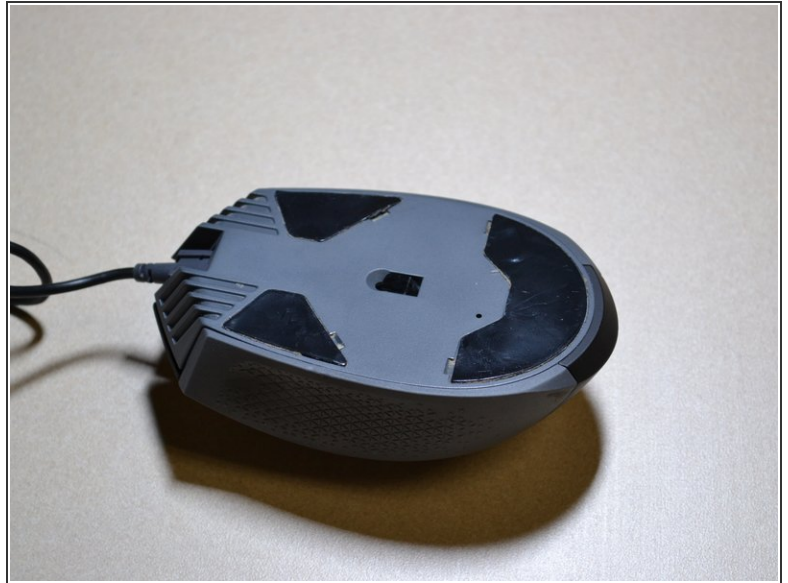

---

### TOOLS:

- [JIS #0 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Corsair Katar Disassembly

⚠ Unplug your mouse before starting.

- Flip the mouse over so the bottom is facing up.

## Step 2

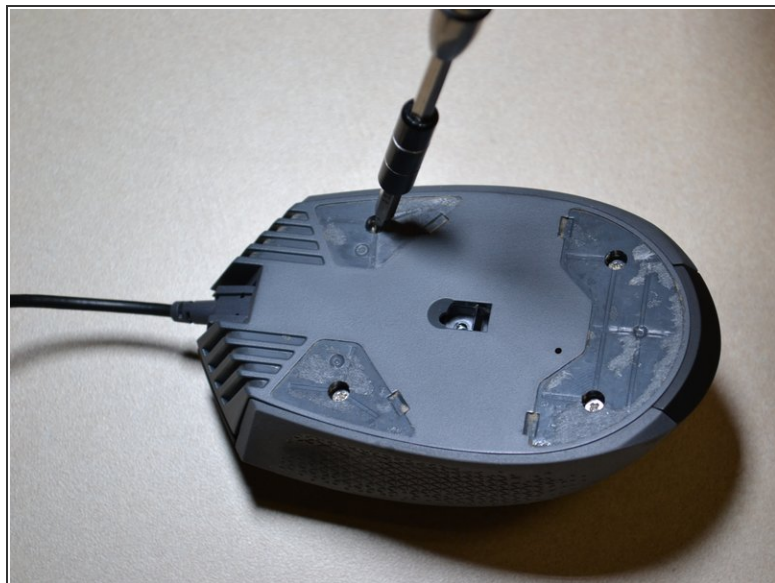

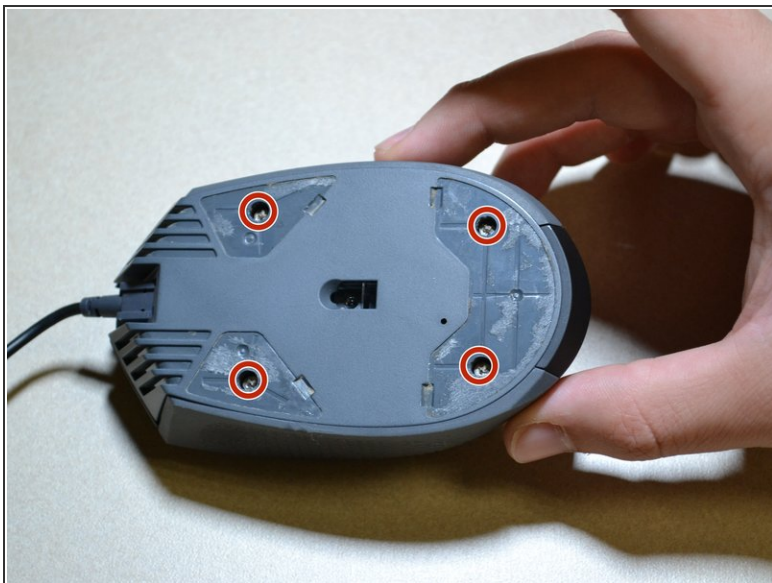

- Remove the three skates on the bottom of the mouse using the plastic opening tools.

ⓘ Skates will be very sticky.

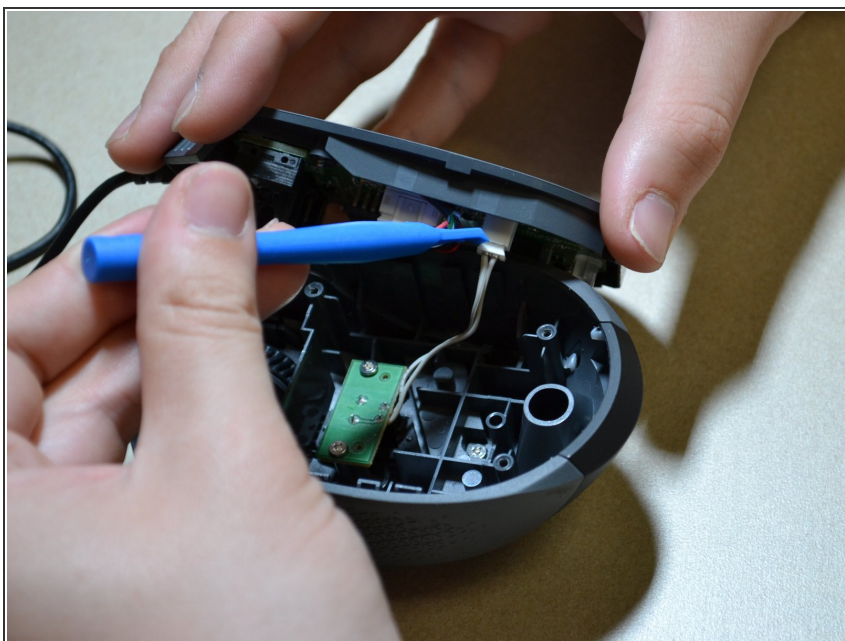

### Step 3

- Use the JIS 0 screwdriver to remove the four 5 mm screws on the bottom of the mouse.

### Step 4

- Detach the bottom of the mouse from the upper shell.
- ⚠ Remove the shell slowly so as not to damage the white DPI cable inside the mouse.
- Use the plastic opening tool to detach the white DPI sensor cable from its port.
- ⓘ Alternatively, you can use your hand to remove the DPI sensor cable by wiggling it out of the port.

To reassemble your device, follow these instructions in reverse order.
