

# Moto C Plus Daughterboard Replacement

Use this guide to remove the daughterboard...

Written By: Dominik Schnabelrauch

# INTRODUCTION

Use this guide to remove the daughterboard including the vibration motor in the Motorola Moto C Plus.

Before you begin, download the [Rescue and Smart Assistant](#) app to backup your device and diagnose whether your problem is software or hardware related.

---

## TOOLS:

[Spudger](#) (1)

[iFixit Opening Picks \(Set of 6\)](#) (1)

[Phillips #00 Screwdriver](#) (1)

[iOpener](#) (1)

[Tweezers](#) (1)

---

## Step 1 — Back Cover

 Power off your phone before beginning disassembly.

- Insert a thumbnail, or spudger, into the notch on the bottom right to start separating the phone unit from the back cover.
- Move to the bottom left corner and pry the phone unit out of the back cover until you can get a good grip.

## Step 2

- Lift the phone out of the back cover.

## Step 3 — Battery

- Use a spudger or fingernail to lift the battery starting at the notch on the bottom left.
- Lever the battery out of its recess and remove it.

## Step 4 — Daughterboard Cover

- Remove the six 3.1 mm Phillips #00 screws securing the daughterboard cover.

## Step 5

- Apply a spudger to the right side of the daughterboard cover.
- Twist the spudger sideways to pry up the daughterboard cover until you get a good grip.
- Remove the daughterboard cover.

## Step 6 — Daughterboard

- Disconnect the antenna cable and fold it out of the way.

## Step 7

- Use the tip of a spudger to open the brown flap of the ZIF connector that holds the interconnect cable in its place.
- ☑ When reassembling make sure the white line on the cable aligns with the closed flap.

## Step 8

- Use a pair of tweezers to pull the interconnect flex cable out of the ZIF connector.

## Step 9

- [Prepare an iOpener](#) and apply it to the bottom part of the display for at least two minutes to loosen the adhesive beneath the daughterboard.

## Step 10

- Apply an opening pick to the bottom edge of the daughterboard.
- Carefully slide the opening pick under the daughterboard to cut the adhesive underneath.
  - ⓘ Take care to cut the adhesive underneath the vibration motor.
- Slide the opening pick from right to left to cut all the adhesive.

## Step 11

- Remove the daughterboard including the soldered-on vibration motor.

---

To reassemble your device, follow these instructions in reverse order.

Apply new adhesive where it's necessary.
