Power Connection

If your Keurig K75 Platinum Brewing System doesn't turn on, verify that your device has a good electrical power connection.

Written By: Charles Tao

INTRODUCTION

Check the on/off switch and outlet connection on the brewer.

⚙ PARTS:

- Electrical Outlet (1)

Step 1 — Power Connection

- Grab the three-pronged power cable of the device and connect it to an electrically stable power outlet.

Step 2

- Turn on the device by pressing the switch once, shown in the picture.

- ⓘ If plugging in and turning on the power switch of the device does not turn the brewer on, make sure the power outlet and circuit breaker of your building is functioning.
