

iRobot Braava Jet 240 Mop Pad Replacement

Use this guide to replace the Mop Pad in your iRobot Braava Jet 240, model number: B240020.

Written By: Claire Franz

INTRODUCTION

The pad is a disposable attachment that wipes the surface the robot drives over. If the cleaning pad on the iRobot Braava Jet 240 has become dirty and no longer cleans, use this guide to replace it. The cleaning pad should also be removed when replacing other parts of the robot, as the pad obscures several screws used to open the robot.

Step 1 — Mop Pad

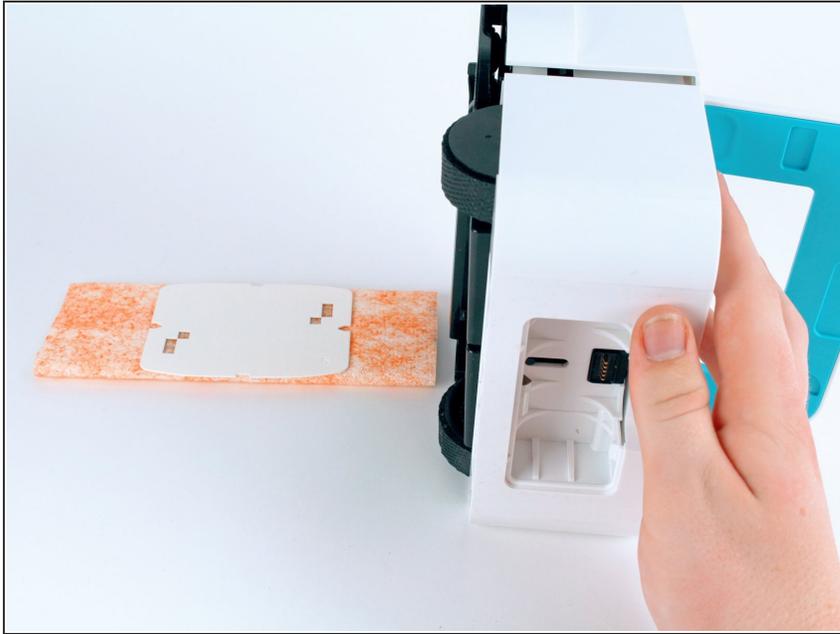

- Lift up the handle to reveal the eject button.

Step 2

- Use your finger to push the eject button forward.

Step 3

- Tilt the robot on its side and let the mop pad slide out.

To reassemble your device, follow these instructions in reverse order.
