Dell XPS 15 9510 Headphone Jack Replacement

Written By: Austin Sa

## Step 1 — Rear Panel

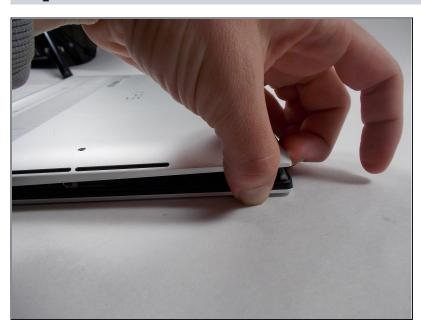

ⓘ Make sure the laptop is powered off and unplug all cables before beginning any repair.

● Remove eight 3 mm screws from the underside of the case using a T5 Torx screwdriver.

Step 2

⚠ The metal case of the XPS 15 9510 is extremely sharp, so be careful not to run your fingers along the edge when disassembling the laptop.

- Wedge the case apart with a nylon spudger.

ⓘ If the plastic one isn't possible to insert, use the metal spudger to carefully create a small gap first.
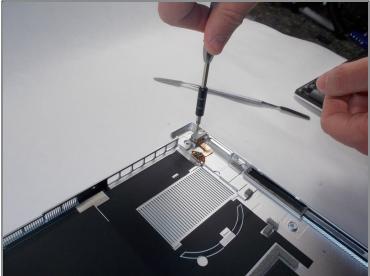

- Slide spudger along each side of the laptop

Step 3

⚠ The metal case of the XPS 15 9510 is extremely sharp, so be careful not to run your fingers along the edge when disassembling the laptop.

- Lift the back panel of the laptop off and set it aside.

Step 4 — Headphone Jack

- Remove three screws connecting the headphone jack to the back panel using a Phillips #00 screwdriver.

Step 5

- Carefully lift the headphone jack off the removed panel.

To reassemble your device, follow these instructions in reverse order.
