ResMed AirSense 10 Top Cover Replacement

Written By: Mitchell Novak

INTRODUCTION

This guide shows how to remove the top cover, and acts as a prerequisite for the Motherboard and the Wireless Communication Board guides.

� TOOLS:

- TR10 Torx Security Screwdriver (1)
- iFixit Opening Tool (1)

Step 1 — Top Cover

- Remove the water tub by gently pulling it out.

Step 2

- Pry off the face plate by using your finger or an opening tool.

  (i) Use a moderate amount of force when prying open.

- Remove the face plate from the top cover.

(i) There will be a clicking sound on either side of the divot when assembling and disassembling.

Step 3

- Unscrew and remove the two 11.8 mm TR10 Torx screws that were revealed from the face plate being removed.

Step 4

- Unscrew and remove the two 11.8 mm TR10 Torx screws from the bottom of the device.

Step 5

- Remove the top cover from the rest of the device.

To reassemble your device, follow these instructions in reverse order.
