

# Ricoh YF-20 Super Front Cover Replacement

This process involves removing the back cover...

Written By: Eric Dazet

# INTRODUCTION

This process involves removing the back cover and the front cover of the Ricoh YF-20 Super camera.

## TOOLS:

Phillips #1 Screwdriver (1)

### Step 1 — Front Cover

- Unscrew the seven indicated screws from the left, right, bottom, and back sides of the camera.

## Step 2

- Loosen the back cover from both the left and the right sides of the camera.

⚠ Remove back cover. The lid of the battery compartment may fall off because it is not attached to anything.

## Step 3

- Open the film compartment.
  - Press your finger on top of the grey latch on the left side of the camera.

## Step 4

- ① Removing the film compartment door is optional. However, it may aid maneuverability in future steps.
- Use a thin object like a toothpick or a small screwdriver to push down on the metal pin holding the film compartment door in place.
  - Use your fingers to completely remove the metal pin.
  - Remove the film compartment door.

## Step 5

- Using a thin shaft screwdriver, unscrew the two indicated screws within the film compartment.

## Step 6

- Loosen the front cover from the left and right sides of the camera.
- Remove the front cover.

---

To reassemble your device, follow these instructions in reverse order.
