## INTRODUCTION

This guide details the process of removing the keyboard from an LG Rumor Touch. Installation of the keyboard can be accomplished by reversing the process.

### TOOLS:

[Outil pour ouvrir iFixit](#) (1)

[Tournevis cruciforme #00](#) (1)

### Step 1 — Battery

- Remove the phone's back cover by placing your thumb the above charging port, located at the bottom of the phone, and sliding the back cover upward.

## Step 2

- Gently pry the battery out of the phone with the spudger.

## Step 3 — Inner Shell

- Unscrew the 5 #1 5mm screws.

## Step 4

- Lift the inner shell from the phone.

## Step 5 — Keyboard Pad

- Remove the main circuit board.
- Remove the keyboard membrane.

To reassemble your device, follow these instructions in reverse order.
