INTRODUCTION

Use this archived guide to understand how to remove a battery from Casio G'zOne Commando.

🔧 TOOLS:

iFixit Opening Tool (1)
plastic
This tool is not required but is suggested.

Step 1 — Open back cover.

ⓘ This device is waterproof and well sealed, so it is difficult to open this handset.

● Start by opening the cover of the handset.

⚠️ Do not use your nails to open the cover. Use the iFixit Opening Tool (refer to the image).

Step 2 — Free and remove the battery

- Move the orange tab to the right side to take out the battery.

- Remove the battery.

To reassemble your device, follow these instructions in reverse order.
