Step 1 — Battery

- Set the phone screen down on a clean flat, surface.

- Insert the plastic opening tool into the groove located between the body of the phone, and the back plate protecting the battery.

- Open the back of the device by prying around the sides of the back panel using the plastic opening tool.

Step 2

- Insert the plastic opening tool in between the battery and the phone body.

- Pry up on the side of battery, and remove it.
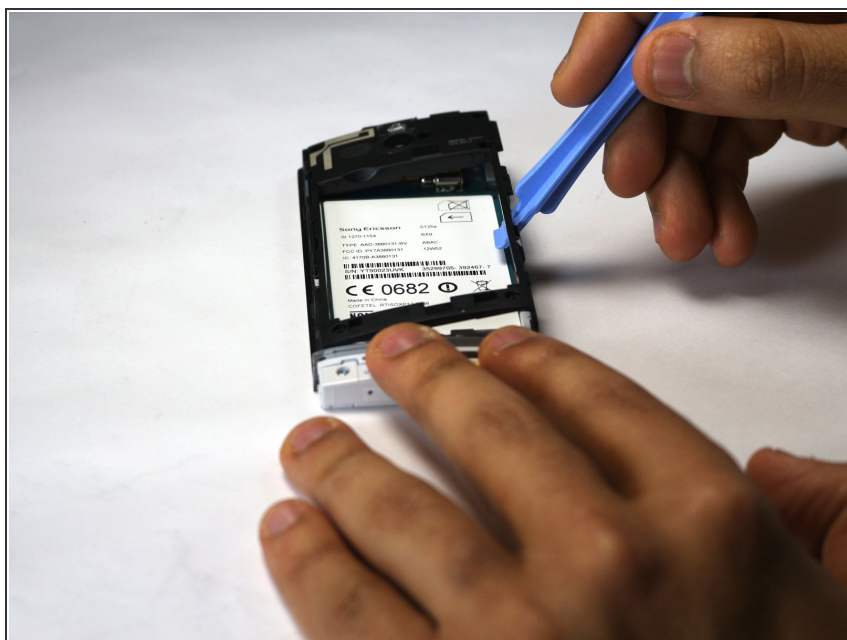

Step 3 — Motherboard

- Remove the bottom cover of the phone using the plastic opening tool.
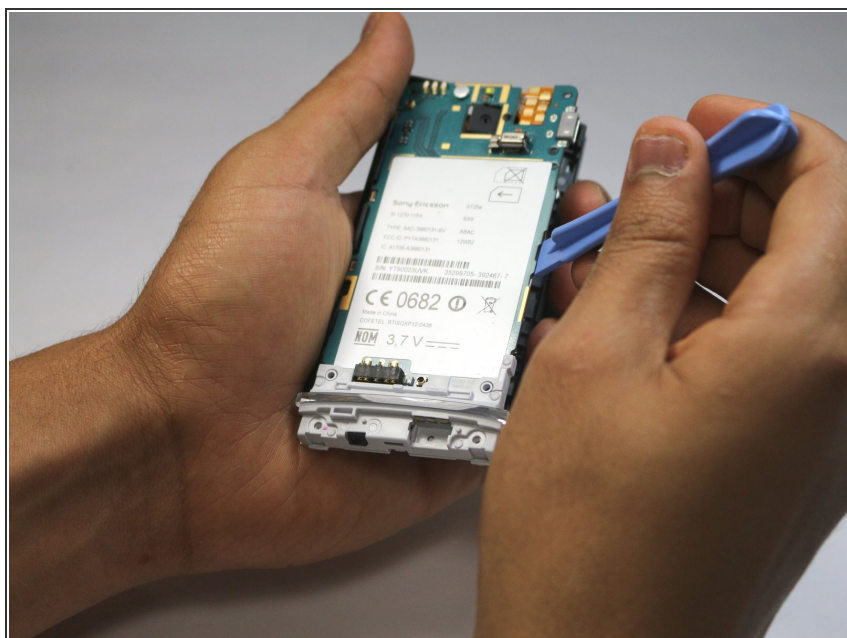

Step 4

- Remove the five 5.47mm and one 5.18mm Torx head screws using a Phillips #0 screwdriver.
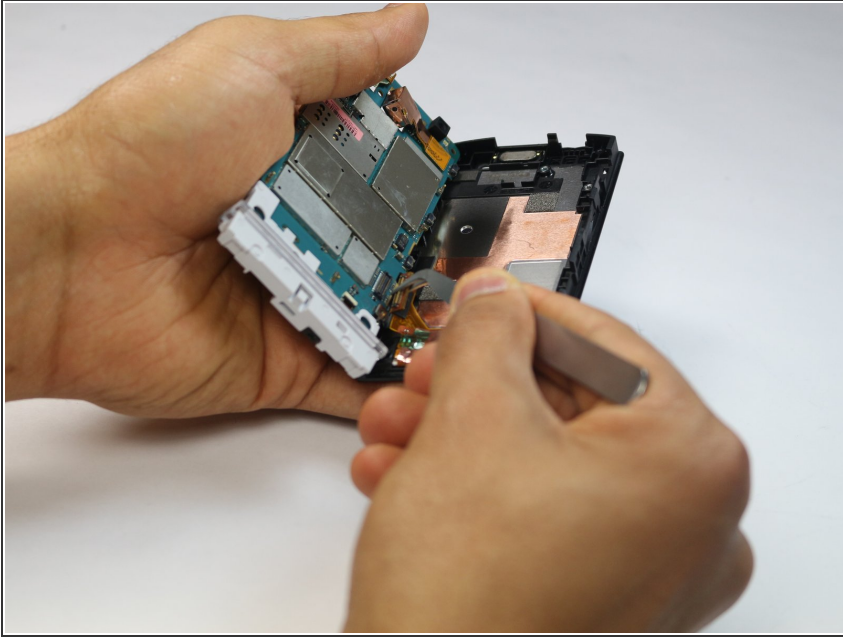

Step 5

● Carefully remove the back cover using the plastic opening tool.
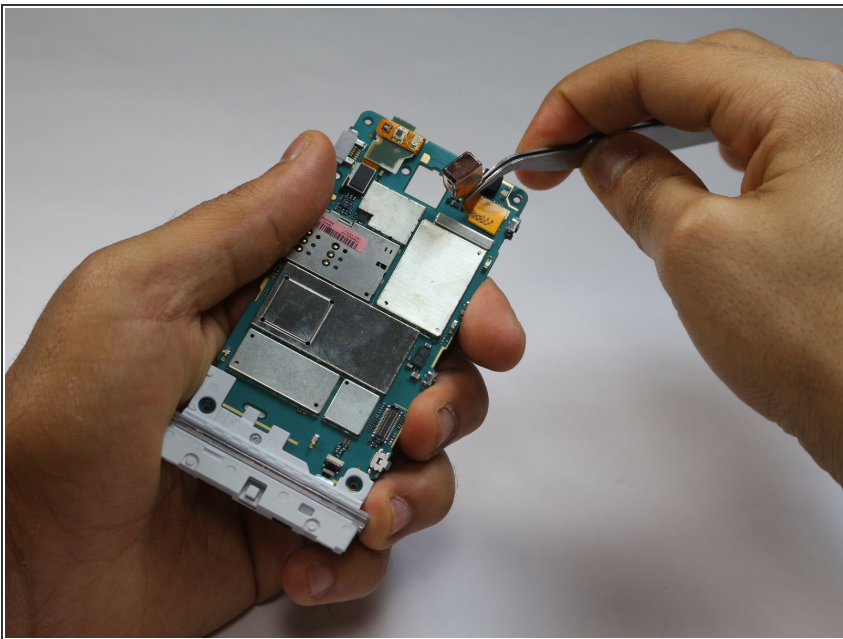

Step 6

● Pry up on the right side of the motherboard using the plastic opening tool.

Step 7

- Carefully detach the flex cable using a pair of tweezers.

Step 8 — Rear Facing Camera

- Use the tweezers to detach the flex cable to remove the camera.

To reassemble your device, follow these instructions in reverse order.
