# INTRODUCTION

If your wi-fi keeps disconnecting or cannot connect at all even when other devices work properly, consider replacing your wireless card.

## 🔧 TOOLS:

- Small Phillips Head Screwdriver (1)
- iFixit Opening Tools (1)

## Step 1 — Battery

- Remove battery by pushing the two tabs and pulling the battery outwards slowly but firmly.

## Step 2 — Remove back plate

- Using a spudger, pry the plastic plate off of the base of the computer.

This document was generated on 2020-11-28 04:07:58 AM (MST).

## Step 3 — Remove screws

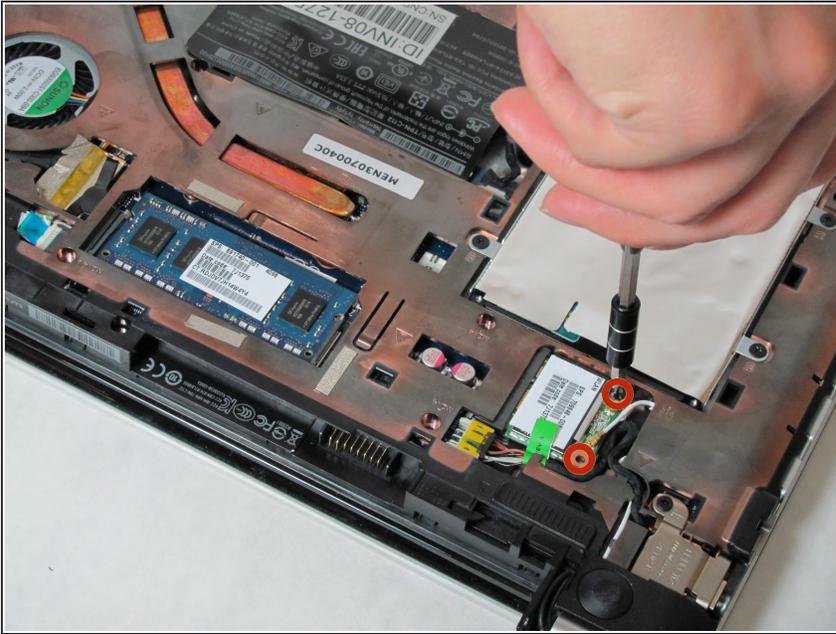

- Remove the screws from the WLAN card

## Step 4 — Remove WLAN card

- Remove the card by sliding out of the slot.

## Step 5 — Disconnect the cables

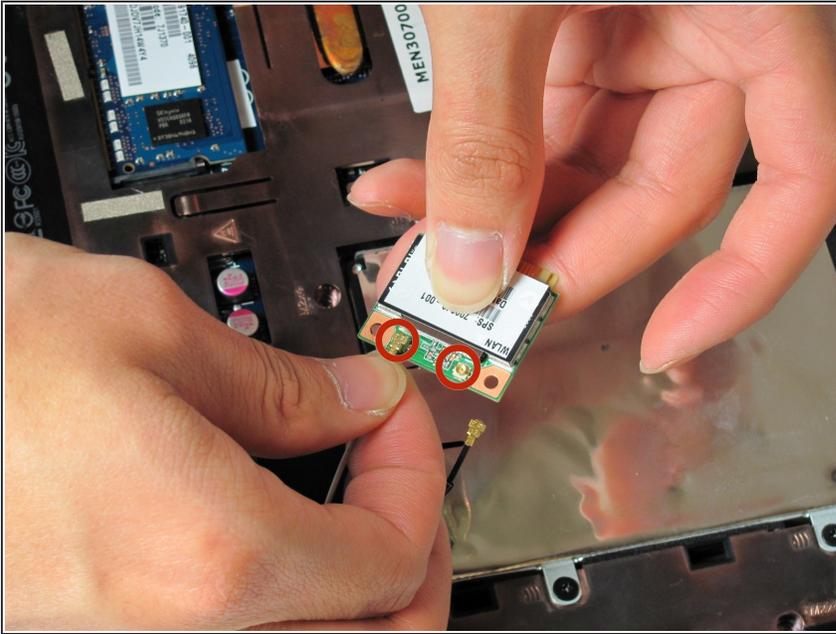

- Remove the cables from their connections by pulling them off. They should snap on and off.

To reassemble your device, follow these instructions in reverse order.
