Replacing Creative Zen X-Fi Rubber Button Cover
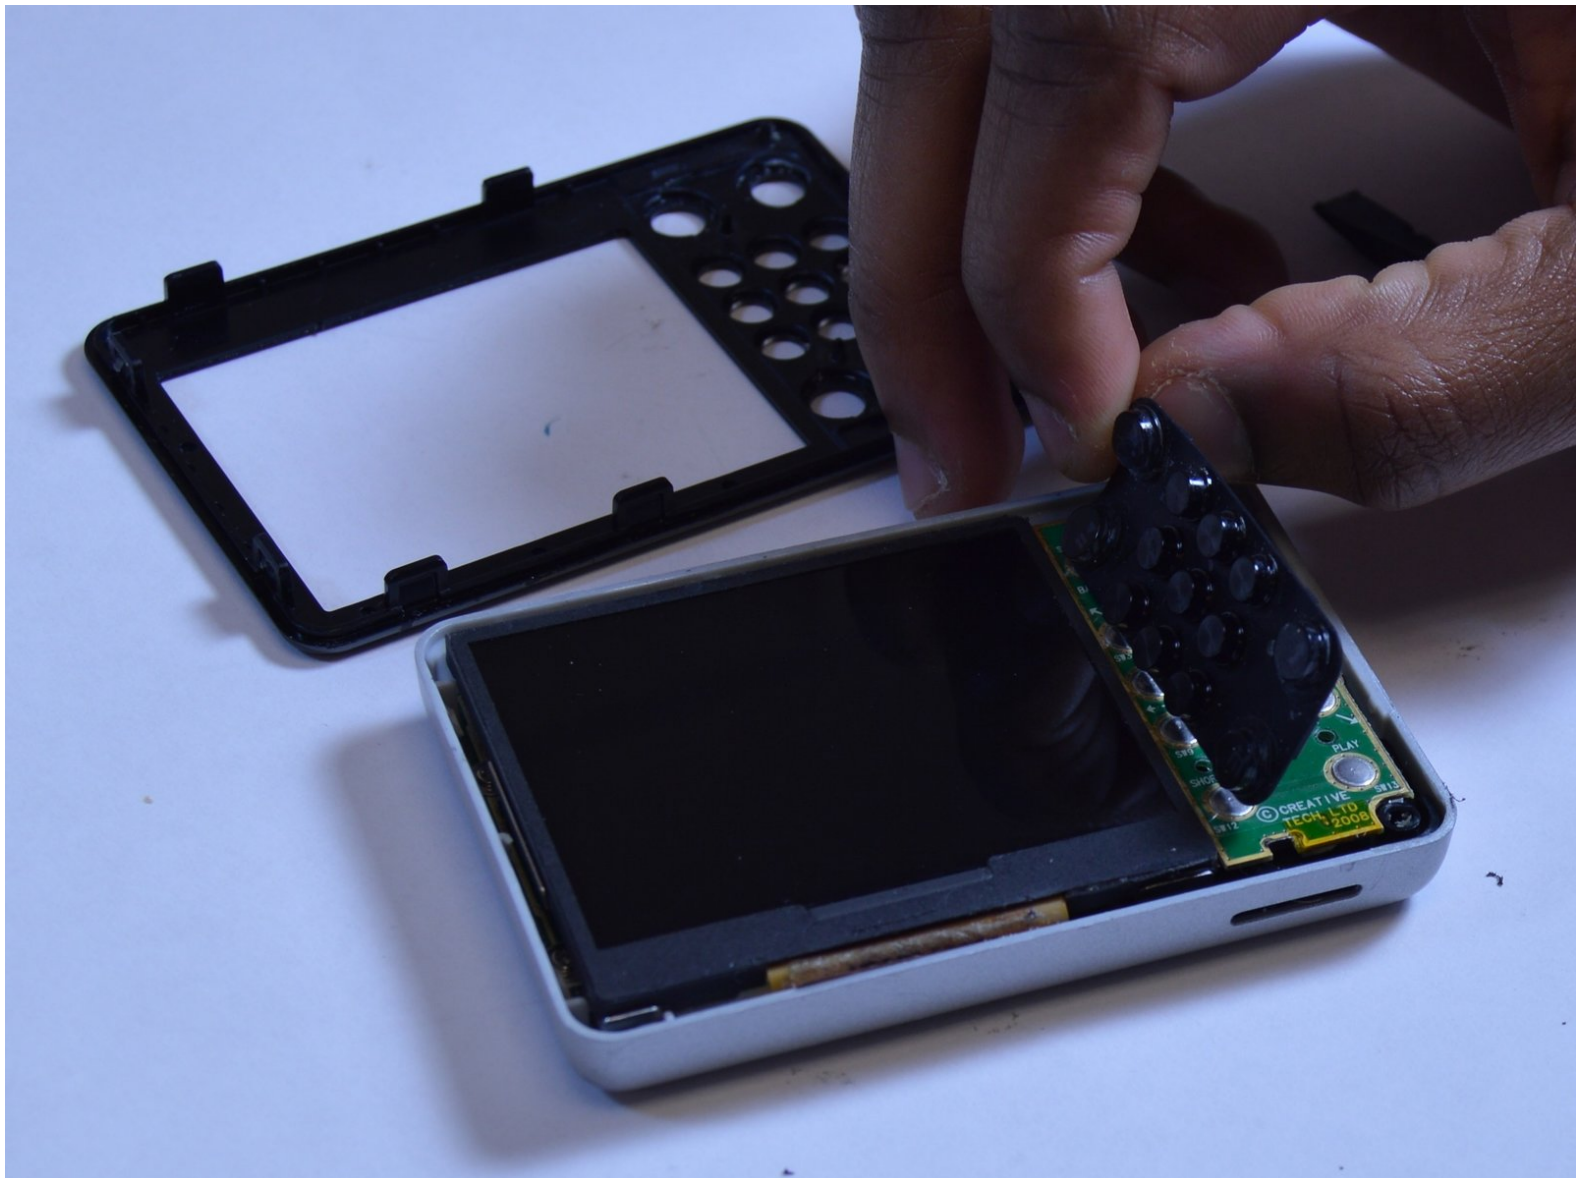

This guide will attempt to remove rubber padding used to protect the input circuity below.

Written By: Westley Courchene

INTRODUCTION

The cover is used for protecting the underlying circuit and contributing to the overall device's aesthetic.

## 🔧 TOOLS:

- Spudger (1)

This document was generated on 2020-11-24 01:09:00 AM (MST).

Step 1 — Detaching Front Case

- Using a spudger, wedge the tip between the front and back case to pry them apart.

- ⓘ Be careful to not apply excessive force since there are six fasteners on the screen's side that holds the cases firmly together.

Step 2 — Rubber Button Cover

- The black rubber button pad can be removed by simply picking it up.

To reassemble your device, follow these instructions in reverse order.
