

# Motorola Moto 360 Rear Cover Replacement

This guide covers removing the rear cover of the Moto 360.

Written By: Cole Twitchell

---

## INTRODUCTION

This panel should be removed to get to all of the watch's insides. It is extremely fragile, so use caution when removing it.

---

### TOOLS:

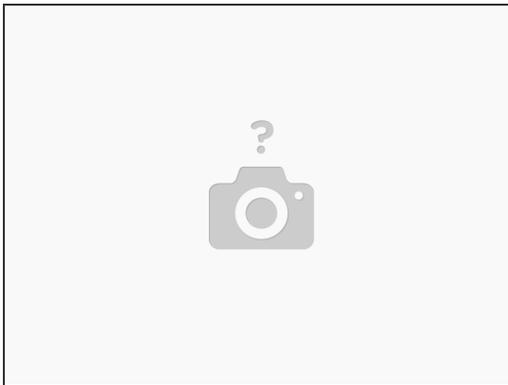

- [iOpener Kit](#) (1)
-

## Step 1 — Rear Cover

- Set the watch face down on a flat surface.
- Place the heated [iOpener](#) on the face of the rear cover to loosen the adhesive underneath.

## Step 2 — Remove the back cover without force

- Follow the instructions here to remove the back cover without force by using some needles in the right places:
- [Motorola Moto 360 Case Locking Fastener Replacement](#)
- Then continue with step 5. Or don't use needles and just continue with the next steps.

## Step 3

- Gently slide the blue opening pick between the rear cover and the metal casing.
  - ⚠ The rear cover is extremely fragile. Be very delicate when using the opening pick.
- Work your way entirely around the rear cover.
  - ⓘ It may take several attempts of reheating the adhesive to get the rear cover loose enough to pull off.

## Step 4

- Once the adhesive has been successfully loosened, gently pull the rear cover off.

To reassemble your device, follow these instructions in reverse order.
