

samsung x820 LCD Replacement

replacement of lcd on samsung sgh x820

Written By: sergeygraf

INTRODUCTION

it`s easy and very quick replacement. it could be completed even with fingerskate screwdriver, but i used simple philips 1,7 from my toolkit.

TOOLS:

- [Essential Electronics Toolkit \(1\)](#)
-

Step 1 — LCD

- samsung sgh x820

Step 2

- after removing the battery, remove the five small Phillips-head screws with a #0 Phillips screwdriver.

Step 3

- now we have two more screws hidden
- first time i used needle. this time i took a blade.
- removing the last two philipps-head screws.

Step 4

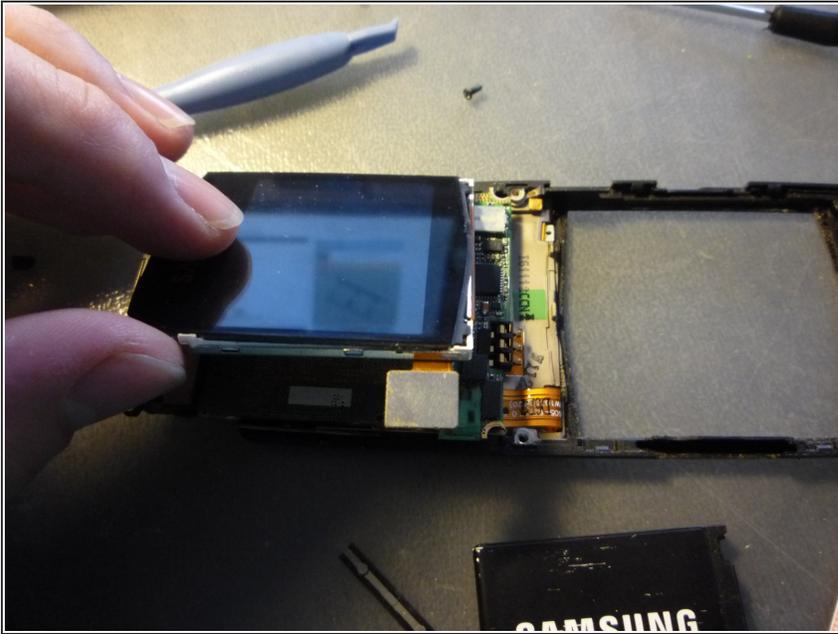

- be carefull. the phone is thin and you should push on two hooks two open cover case.

Step 5

- now you should take of the square metal in the middle of your phone to eject display.
- i used plastic spudger

Step 6

- the last step is to take of old lcd from main board. mine was easy to go, but probably it could be stuck with the glue and i recommend to use a blade carefully.

To reassemble your device, follow these instructions in reverse order.
