TOOLS:

- [Heat Gun](#) (1)
 - [iFixit Opening Picks set of 6](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
 - [Spudger](#) (1)
 - [Tweezers](#) (1)
 - [Suction Handle](#) (1)
-

Step 1 — Sony Xperia Z5C Teardown

- Power off and remove SIM card tray.

Step 2

- Heat up the back cover to soften the adhesive.
- Place the suction cup to open a gap from top side, then insert guitar picks and slide it to cut the adhesive underneath.
- Remove back cover.

Step 3

- Twist off 10 Phillips screws all.
- Loosen NFC clip and flashlight clip.

Step 4

- Remove the plastic bracket.
- Pry up and remove back frame.

Step 5

- Remove front camera.

Step 6

- Remove earpiece.

Step 7

- Remove rear camera.

Step 8

- Remove loudspeaker.

Step 9

- Release charging port connector.
- Remove plastic protective bar.
- Pry up motherboard assembly from this side. There are three flex connectors connecting the motherboard underneath. So pry up the motherboard assembly gently.
- The motherboard may be attached to the case by a sticky pad near the charging connector. This can be dislodged by very carefully rotating the motherboard side to side, checking that the flex connectors aren't being stretched.

Step 10

- Push audio jack out of the slot, no adhesive underneath.
- Release LCD flex connector and main flex connector by flipping up the white locking tab of the connector base.
- Separate motherboard assembly from middle housing.

This document was generated on 2020-11-16 10:16:21 AM (MST).

Step 11

- Remove audio jack flex by flipping up the white locking tab of the connector base.

Step 12

- Remove flashlight flex by flipping up the white locking tab of the connector base.

Step 13

- Remove microphone flex by flipping up the white locking tab of the connector base.

Step 14

- Take away NFC antenna on battery.

Step 15

- Release battery connector and pull off adhesive tapes underneath.
- Pry up and remove battery.

Step 16

- Here is the motherboard only.

Step 17

- Remove charging port flex.

Step 18

- Loosen adhesive underneath vibration motor.
- Loosen side button assembly. There is fingerprint scanner here, be careful.
- Loosen noise canceling microphone.

Step 19

- Loosen all adhesive underneath side button flex assembly.
- Here is side button flex assembly. It's integrated by vibration motor, side button connector, fingerprint scanner connector and noise-canceling mic.

Step 20

- The sticker underneath LCD assembly is a little bit strong, so use heat gun to soften it for a few minutes.
- Remove LCD with digitizer assembly carefully.

Step 21

● Done.
