INTRODUCTION

How to remove the SIM card.

TOOLS:
- SIM Card Eject Tool (1)

PARTS:
- iPhone 3G and 3GS SIM Tray (1)

This document was generated on 2022-04-12 10:54:54 PM (MST).

Step 1 — SIM Card
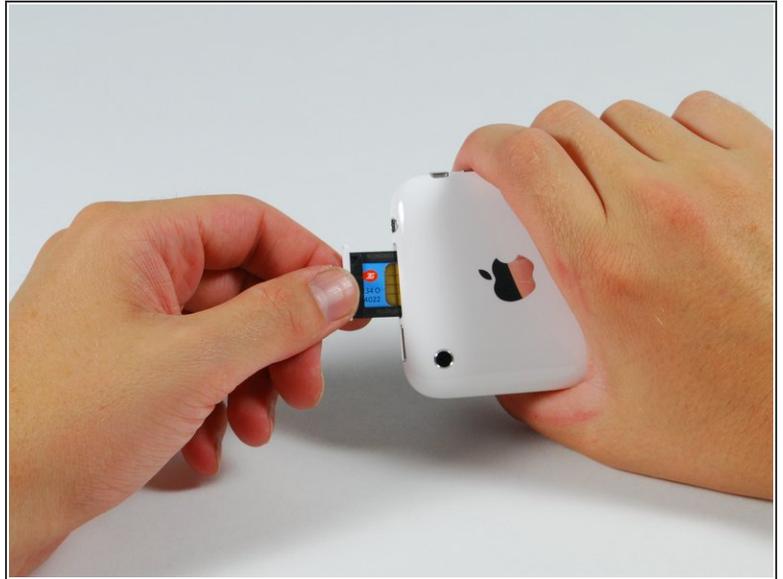

ⓘ Apple includes a "SIM eject tool" with the iPhone 3G. If you don't have this tool, don't worry, an ordinary paperclip works just as well.

- Insert your SIM eject tool or a paper clip into the hole next to the headphone jack.

- Press down on the tool until the SIM card tray pops out.

Step 2
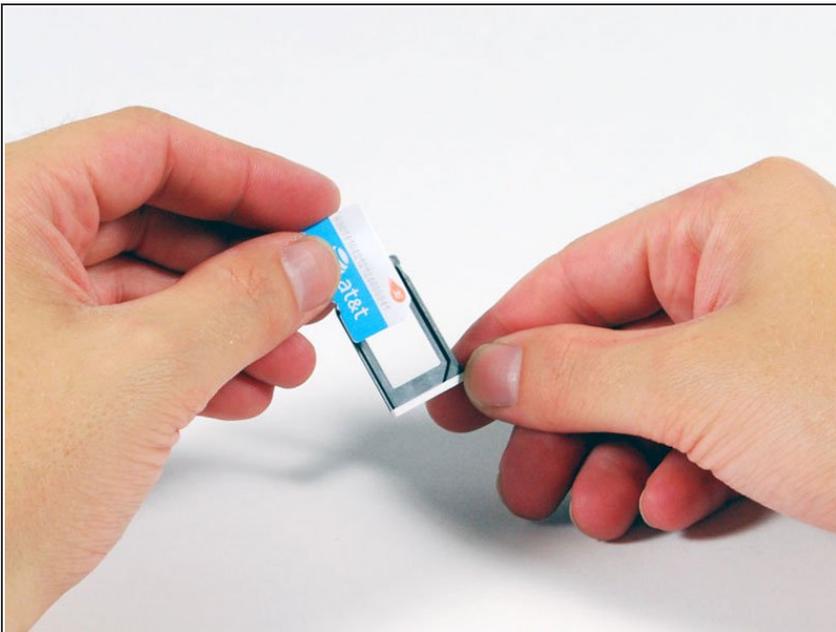

- Remove the SIM card from the SIM card tray.

⚲ The cut-off corner should make it easy to reinstall the SIM card in the correct orientation.
