# Nokia N70 Back Camera Replacement

Written By: Justin

## 🔧 TOOLS:

- iFixit Opening Tools (1)
- T6 Torx Screwdriver (1)

Step 1 — Battery

- Orient the phone as shown.

- Press the button with the plastic opening tool and slide the back case downward relative to the phone.
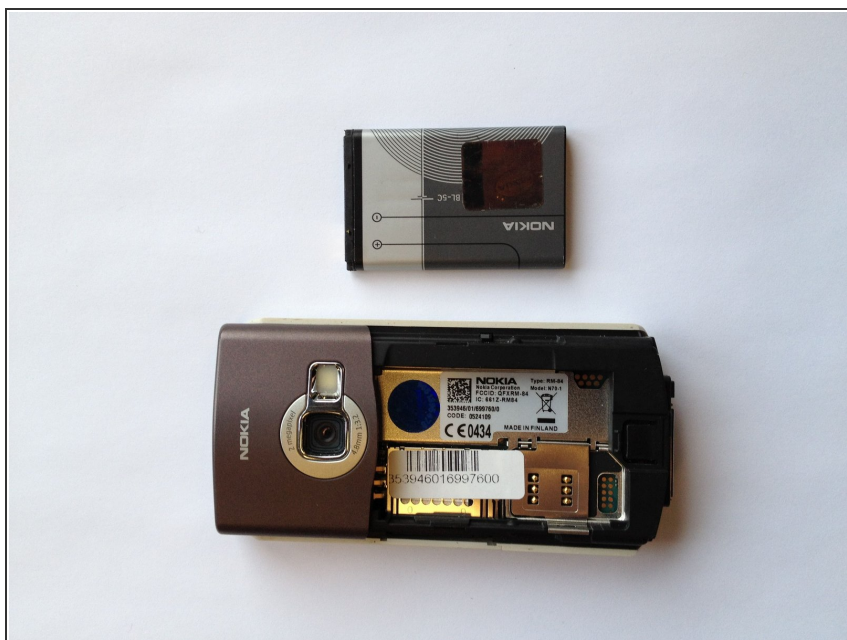

Step 2

- Remove the battery cover by lifting it away from the phone.

This document was generated on 2020-11-28 02:23:42 AM (MST).
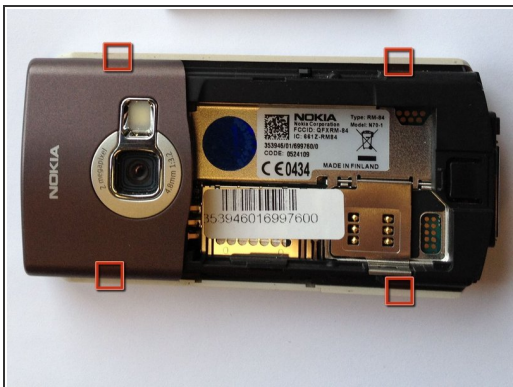

Step 3

- Insert the plastic opening tool into the marked space.

- Lift up the side of the battery closest to the bottom edge of the phone using the plastic opening tool.

Step 4

- Remove the battery from the phone.
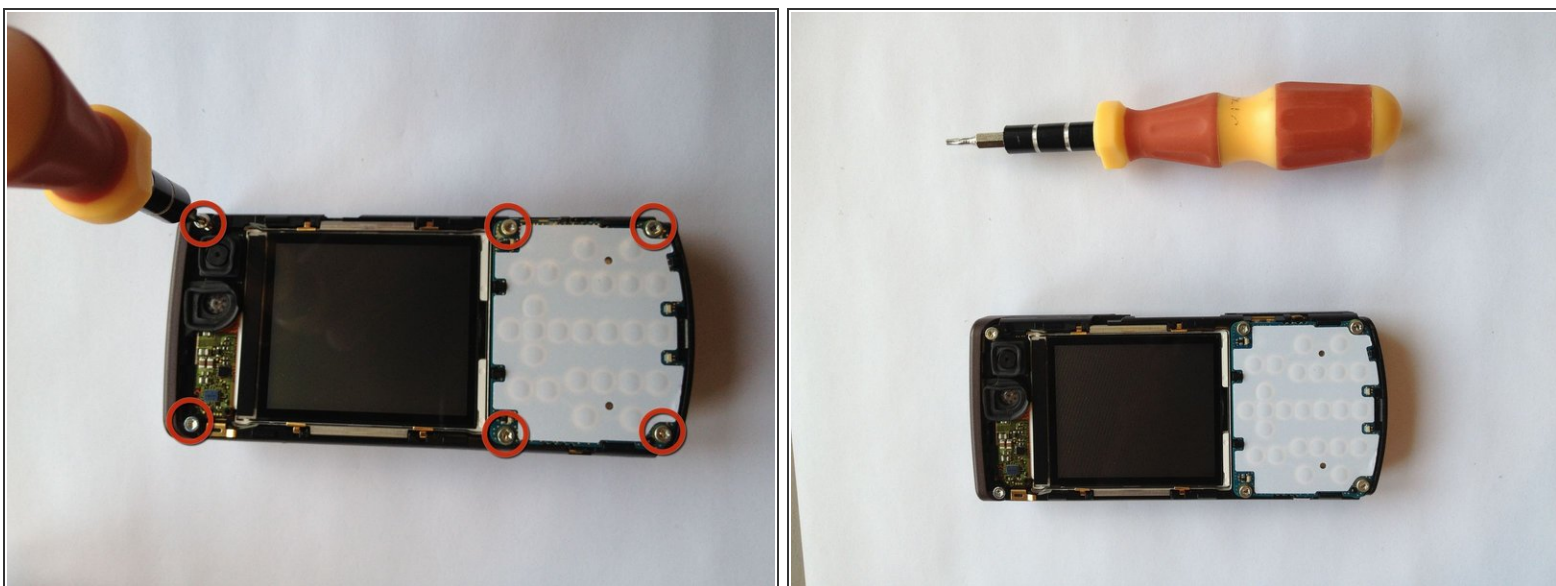

Step 5 — Keypad

- Insert the plastic opening tool in the marked areas in between the front and back covers.

- Pry each corner with the plastic opening tool until the front case completely detaches.

Step 6

- Orient the phone so that the keypad is facing you.

- Remove the keypad by lifting it away from the phone.
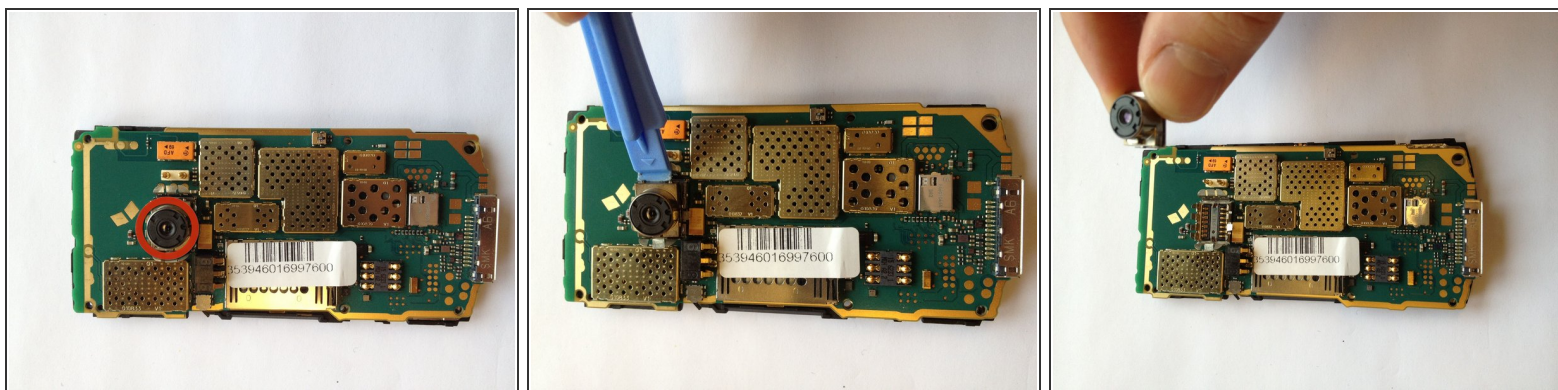

Step 7 — Back Camera

- Using T6 Torx screwdriver remove the six 15 mm torx screws.

Step 8

- Separate the front panel from the back by lifting the bottom of the front panel at a 45 degree angle.

- Remove the front panel by lifting the panel away from the phone at a 45 degree angle.

Step 9

- Locate the rear circuit board by flipping over the front panel.

- Locate the rear camera and by using the plastic opening tool, gently lift the camera out of the slot.

⚠ Caution: Be careful when prying camera out of the slot for the connections are fragile.

To reassemble your device, follow these instructions in reverse order.
