INTRODUCTION

Hey, we are a group of students from Central Coast New Tech High working on out iFixit project.

TOOLS:

- Phillips #0 Screwdriver (1)
- iFixit Opening Tool (1)
- Metal Spudger (1)
- Socket Set (1)
- Tweezers (1)

PARTS:

- New Camera Lense (1)

Step 1 — Lytro Camera First Generation Lens

- Pull the top off using your hands or the plastic opening tool.

Step 2

- Unscrew the four screws(7.1cm) seen after taking the top off.

This document was generated on 2022-06-06 10:36:30 AM (MST).

Step 3

- Pry that silver piece off that you just took the four screws out of.

Step 4

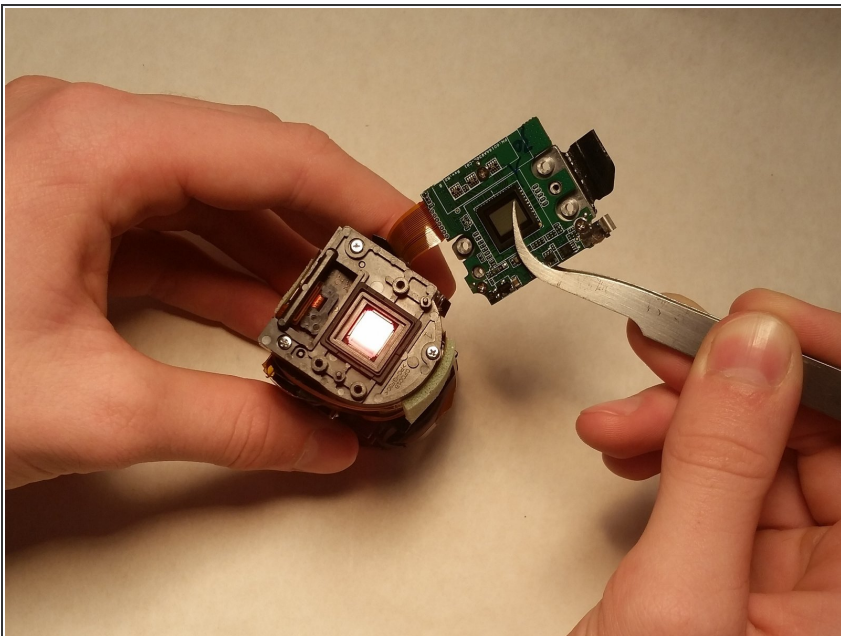

- Take the camera out of the red part. You should have 3 piece not including the top.
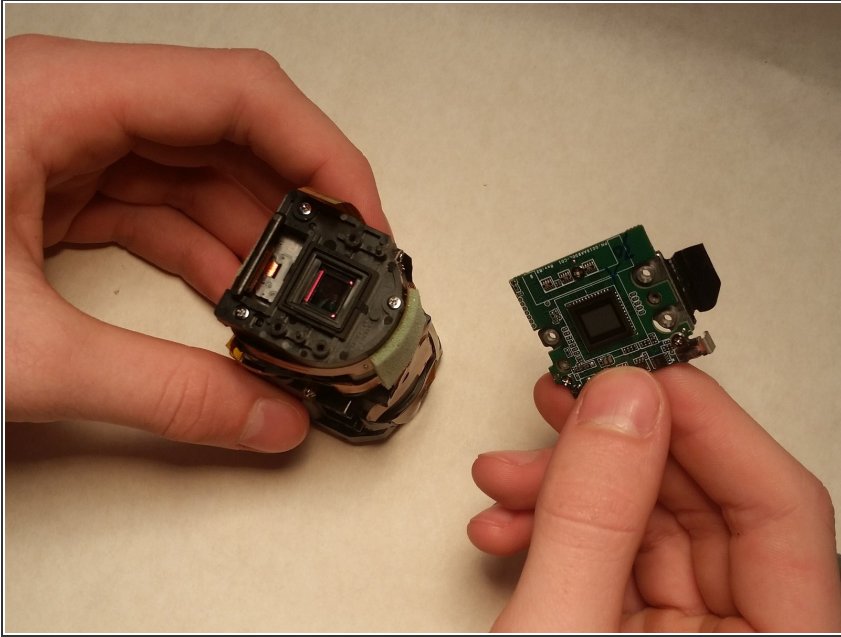

Step 5

- Take the 3 screws(.5) out of the middle piece.

Step 6

- After taking that off you will see the camera lens.

This document was generated on 2022-06-06 10:36:30 AM (MST).
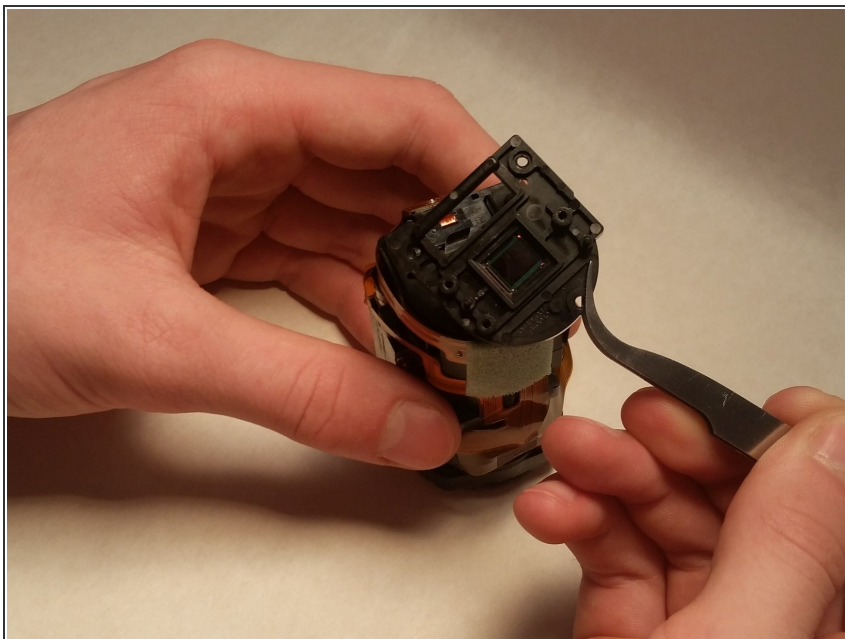

Step 7

- Pry the piece hanging off with tweezers.

Step 8

- Now you can unscrew the three screws(.5) seen releasing the camera lense from the camera.

Step 9

- After that you can pull it off with the tweezers.

Step 10

- Now that you have it off you can replace it and reverse the steps getting it back together.

To reassemble your device, follow these instructions in reverse order.
