INTRODUCTION

This guide's intent is to provide instructions on how to fix this model of Shark Vacuum, by replacing a broken rotating brush. Its purpose is to educate viewers on how to do this simple repair. The detailed step-by-step instructions include hands-on illustrations throughout the process for this fix. The guide provides the quick, simple steps to locate and remove the brush for replacement. This guide saves viewers money from buying a new Shark Vacuum, by demonstrating how to fix their own.

🔧 TOOLS:

- Flathead 3/32" or 2.5 mm Screwdriver (1)
- 1.5" Thin Putty Knife (1)
- Utility Scissors (1)
- iFixit Tech Knife (1)

Step 1 — Replacing a Rotating Brush

⚠️ Turn vacuum off before starting the fix.

● Power-off vacuum by pressing the button on the left-rear side of vacuum until the red light is off.

● Lay vacuum down with handle lying flat on the floor.

Step 2

⭐ Remove and empty dust tray; make sure to clean any debris built up.

● Lay vacuum up-side-down, locating the broken brush.

Step 3

- Turn the lock counter-clockwise to unlock access to the rotation brush; use a key or flathead screwdriver to fit the lock.

- Remove the square brush cover to access the rotation brush.

- (i) Once unlocked, the small square brush holder will detach.

Step 4

- Remove the large band from the rotation brush.

- Push the band to the side and lift up the right-side of the brush.

Step 5

- Detach left-side of the brush from the vacuum.

Step 6

(i) Use scissors to cut away any debris entangled in the brush.

⚑ The brush is easily damaged by debris if not cleaned regularly; keeping the brush clean lengthens the life of the vacuum.

● Clean the area surrounding the brush by scraping with a putty knife before inserting the replacement brush.

To reassemble the device, follow these instructions in reverse order.
