# GoPro HD Hero2 Rear Case Replacement

GoPro HD Hero2 rear case prerequisite.

Written By: David Hodson

INTRODUCTION

This guide is a prerequisite for removing the mini HDMI port or replacing the rear case.

🔧 TOOLS:

- Tweezers (1)
- Phillips #00 Screwdriver (1)
- iFixit Opening Tools (1)
- Spudger (1)

This document was generated on 2020-11-24 12:12:42 AM (MST).
Step 1 — Rear Case

- Remove the four Phillips #00 screws securing the rear case to the rest of the device:
  - Two 5.5 mm coarse thread screws.
  - Two 4.4 mm fine thread screws.

Step 2

- Slide the edge of a plastic opening tool underneath the sticker on the rear cover and gently peel the sticker up.

- Once you have enough of the sticker peeled up with the plastic opening tool, grab an edge of it with your fingers and pull it off completely.

Step 3

- Grasp the rear case and lift it off of the front case.

⚠ Do not try to completely remove the rear case yet, as it is still attached by the display port ribbon cable.

Step 4

- Using a plastic opening tool or your fingernail, flip up the locking tab on the SD board ribbon cable ZIF connector on the motherboard assembly.

  ⚠ Be careful that you are prying on the locking tab, and not the connector itself.

- Use a pair of tweezers to remove the SD board ribbon cable from its connector on the motherboard.

Step 5

- Lift the speaker out of the rear case with the tip of a spudger.

- Remove the rear case.
