INTRODUCTION

Replace a Faulty PCIe Fan

🔧 **TOOLS:**

[Phillips #1 Screwdriver](#) (1)

---

Step 1 — Side Panel Removal

- Begin by pulling up on the lever located at the back of the computer to remove the side panel.

Step 2 — Hard drive removal

- Gently pull outward on each of the four hard drive trays to remove them.

Step 3 — Fan Removal

- Remove the two 10mm PH #1 screws holding in the PCIe fan.

⚠ They are very tightened, if you do it wrong the screw might get stripped.

Step 4 — Fan Removal

- Gently pull the fan straight outward to remove it.

To reassemble your device, follow these instructions in reverse order.
