INTRODUCTION

This guide details the process of replacing a dead or dying battery within the Samsung NP700Z5AH. This quick and simple process requires only two simple tools to complete.
🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- Tweezers (1)

This document was generated on 2020-11-28 06:12:05 AM (MST).
Step 1 — Battery

- Remove the ten 6.6mm Philips#00 screws securing the lower case to the upper case.

Step 2

- Using your fingers, pinch the edge of the SD card and pull to remove it.

Step 3

- Wedge your fingers in between the upper case and the lower case

- Gently pull the lower case away from the upper case to remove it

Step 4

- Using tweezers or your fingertips, carefully pull on the battery connector to disconnect it from the motherboard.
⚠ Be sure to pull straight backwards, or you risk damaging the wires.

Step 5

- Remove the two 4.4mm Phillips#00 screws from the battery case.

Step 6

- Place your fingers on the corner sections of the battery.

- Lift to remove the battery.

⚠ If you choose to use tools to remove the battery be careful not to damage it. A damaged lithium-ion battery may leak dangerous chemicals and/or catch fire. Use only plastic pry tools.

To reassemble your device, follow these instructions in reverse order.
